

Basic Biostatistics & Research Methodology Workshop

Venue : **Computer Lab, ICT Department, Level 1 Sarawak Heart Centre, Kota Samarahan**
Date : **2nd - 4th February 2018 (Friday – Sunday)**
Speaker: **Mr Mohamad Adam bin Haji Bujang**

Limited to 30 seats only

Workshop Overview

The 'Research Methodology and Biostatistics Workshop' is designed to impart basic skills in research methods and biostatistics. These skills will be needed to design and conduct good quality clinical research. Ideally the participant should have a research idea in mind and have the commitment to see the research through to its completion. Obviously, these workshops will not make one an expert on research methods or statistics but hopefully it may provide sufficient impetus to get the participants started.

Objectives

Upon completion of this workshop, participants should be able to;

- ✓ To understand the basic principles of scientific methods as applied to clinical research
- ✓ To acquire skills in using necessary methodology, statistical tools and techniques in designing and conducting clinical research

Workshop Content

- Introduction to Medical Research
- Research Designs
- Data Preparation & Descriptive Analysis
- Inferential Analysis
- Sample Size Calculation and Estimation
- Discussions & Exercises

Who Should Attend?

- ✚ Clinicians in the Ministry of Health
- ✚ Any clinicians involved with clinical research
- ✚ Personnel in hospitals & health offices
- ✚ Researchers

Our Speaker

Mr Mohamad Adam bin Haji Bujang

Dip in Statistics, Bsc (Hons) Statistics,
MBA, PhD (Statistics)

Mr Mohamad Adam Bujang is a Research Officer and Statistician working with the National Clinical Research Centre (NCRC) in KL for nearly 10 years and currently with the Clinical Research Centre, Sarawak General Hospital since September 2016. His last designation in NCRC was the Sub-Unit Head of the Biostatistics Division (2010 – 2016). He completed his PhD in Statistics with UiTM Shah Alam this year (2017). He has authored and co-authored not less than 60 manuscripts in peer reviewed journals and had presented more than 45 oral or poster presentations in local and international conferences. He is also one of the NMRR's reviewers and an ad-hoc reviewer for scientific peer-reviewed journals for the past 5 years. He is also a consultant for various research projects and as well as invited speaker for numerous workshops. His special interests are in statistical methodology which includes sampling techniques and sample size, questionnaire development and validation, and also statistical and risk modeling.
